

**BBC  
Television**

**Contract Available  
Chemical Historian Grade C  
BBC Television  
¥68-93K, depending on experience**

BBC television require a chemical historian to assist them with their new programme "Crossing over the edge – a look at our unsung extra-solar heros".

The project will involve recreating the chemistry and reasoning behind the advances that stopped the 2006 Gyron Plague becoming a disaster. The post will require a chemical historian of exceptional talent to work from the few surviving documents about the incident. Knowledge of chemical techniques of the era is essential. We will require accurate descriptions of the apparatus and synthetic chemical technology that led to the development of the now unknown pharmacophore that catalysed the birth of modern day galactic exploration.

The post is a fixed term contract for 6 months starting 01/01/2163. The successful candidate will be offered appointment to a salary commensurate with the appointee's experience and performance on problem solving tests.
